CATALOGUE No. 3       Twenty-Fourth Edition

Fruit and Ornamental
... Trees ...
Evergreens, Palms
Shrubs, Roses
Etc.

California Nursery Co.
NILES, CALIFORNIA  Six Hundred Acres
TO CORRESPONDENTS

1st. This Catalogue cancels all previous prices, either in special lists, offers or catalogues. This rule will be strictly observed.

2d. All orders should be sent in as early as possible.

3d. Orders should be legibly written on a separate sheet and not mixed up in the body of the letter, thereby saving us a great deal of trouble and tending to prevent mistakes.

4th. The articles in the following list will be furnished at the annexed prices only when the quantity specified shall be taken. Fifty, however, will be furnished at the hundred rate, and five at the ten rate. In no case does this mean so many trees of assorted classes, but refers only to one class of assorted varieties; for instance, 5 Apples, or 5 Pears, or 5 Plums, of different varieties, but not 2 Apples, 2 Pears, and 1 Plum.

5th. Where particular varieties are ordered, and particular ages and sizes of trees, kind of stock, etc., it should be stated whether, and to what extent, substitution will be allowed in case the order cannot be filled to the letter. Where no instructions in this respect accompany the order, we shall feel at liberty to substitute other varieties as nearly similar as possible. If the selection of varieties is left entirely to us, we shall endeavor to send only such sorts as are acknowledged to give general satisfaction.

6th. All trees and plants are carefully labeled, and securely packed in the best manner, for which a moderate charge, sufficient to cover cost of material only, will be made; but no charge is made for the delivery of packages to the railroad or express offices at Niles.

7th. It is requested that explicit directions for marking and shipping packages accompany each order. When it is left for us to choose the mode of conveyance, we will exercise our best judgment; but as all articles are at the risk of the purchaser after being shipped, we must not be held responsible for any loss or delay that may occur through the negligence of the transportation companies.

8th. We warrant all trees and plants to be good, thrifty, and true to label, but having no control over the planting or care after delivery to the buyer, we will not be responsible in any other direction than as stated, and accordingly, if any tree or plant should prove untrue to kind, we will either replace the same or refund the amount paid; but in no case will we be liable for any sum greater than that originally paid, and this statement is due notice to buyers of the extent of our responsibility for trees and plants after delivery of the same shall have been accepted by the buyer.

9th. Our customers are requested to notify us immediately of any errors that may be committed in filling their orders, so that we may at once rectify the same, as we desire to conduct our business in all respects satisfactorily to those who favor us with their confidence.

10th. Orders from unknown correspondents must be accompanied by the cash or satisfactory reference. Orders to be sent C. O. D. must be accompanied by at least one-half the amount in cash; otherwise they will receive no attention.

11th. Remittances may be made by draft on San Francisco, or Wells Fargo & Company and postoffice money orders on Niles, or cash by express, prepaid.

All communications to be addressed to

California Nursery Co.

NILES, CALIFORNIA
We present herewith our price-list for the coming season (twenty-fourth edition), and wish to call attention to a few facts. Our nurseries are the most complete on the Pacific Coast. Our shipping facilities are unexcelled both for domestic and foreign business. For many years we have led in introducing and testing, under California conditions, the most promising foreign varieties of fruit. We have in actual bearing here at Niles our own trees of every variety we offer for sale. Our buds and cions are taken from these bearing trees, cut and distributed by one man, making the mixture of varieties well nigh an impossibility. The unequaled reputation which our trees have, not only on the Pacific Coast, but in almost every country in the world, is an indication of the great care we exercise in every detail of our chosen line of work.

All interested parties, whether intending to purchase or not, are invited to visit the nursery, and if we are notified of time of arrival at Niles, and number of persons coming, will have conveyance at station to meet them.

CALIFORNIA NURSERY COMPANY.

Niles, November 1, 1908.

OFFICERS:
H. W. Meek, President.
A. C. Hammond, Vice-President.
John H. Henn, Secretary.
Central Bank, Oakland, Treasurer.
W. V. Eberly, Manager.

DIRECTORS:
W. G. Palmanteer, Oakland.
Horry W. Meek, San Lorenzo.
A. C. Hammond, San Francisco.
W. V. Eberly, Niles.

SPECIAL NOTICE

Those only who can show proper authority of recent date, signed by the Manager, are authorized to take orders for us. We wish to call special attention to this notice, as we know it has heretofore been the practice of unprincipled persons to procure the catalogue of prominent nurseries and take orders in their names, which they fill with poor stock bought elsewhere. If our patrons will notify us of any person who they have reason to believe is not regularly appointed, we shall consider it a favor.

It grieves us to announce that since the last issue of this catalogue WILLIAM J. LANDERS, who was our President for many years, has been lost to us by death. Mr. Landers was well known on the Pacific Coast as a man of large affairs, of great ability, integrity, and honor.
HINTS ON TRANSPLANTING

The many excellent treatises on Fruit Culture which have appeared within the past few years—one or more of which should be in the hands of every person intending to plant—render it almost unnecessary to give any directions in that line; yet we are so frequently asked for advice in this way, that we offer a few general remarks:

The situation of the orchard having been decided on, the ground should be deeply plowed, subsoiled and thoroughly pulverized. The holes should be dug at least a foot larger in every direction than actually required by the roots when spread out in their natural position. In planting, the top soil should be broken down into the hole, and worked carefully in between every root and fiber, filling up every crevice, that every root may be in contact with soil, and the whole made quite firm as the filling up progresses. The tree, when planted, may in light soils stand from two to three inches deeper than it stood in the nursery; but in heavy clay or wet ground it is advisable to have it stand at the same height as it was before transplanting.

On account of our long, hot, dry summers, it is well to shade the sunny side of the tree, to keep borers out, with a board or shake stuck in the ground, or a piece of burlap wound loose around the tree up to the limbs, top tied loose with a string. Whitewash made out of whiting or lime will also protect the tree against sunscald.

See back of Catalogue for list of useful horticultural books we have on hand for sale.

Rule—Square Method.—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre (43,560), will give the number of plants or trees to the acre.

Rule—Equilateral Triangle Method.—Divide the number required to the acre "square method" by the decimal .866. The result will be the number of plants required to the acre by this method.

INDEX AT END OF CATALOG

FRUIT DEPARTMENT

All our Fruit Trees are grown on whole Seedling roots. The advantages of these in promoting the health and thriftiness of trees over others grafted on pieces or sections of roots, or budded on stocks grown from cuttings, is acknowledged by the best authorities, and is easily apparent to the most casual observer. All two-year-old trees are branched low and are stocky, having been cut down or headed back when yearlings, two feet above ground, except where noted.

All of our Apple Trees and Grapevines are fumigated with hydrocyanic gas when dug, so are the buds, cions, and cuttings, prior to budding, grafting, or planting out in Nursery. This positively kills any insects that may be thereon, without any injury to trees or vines. We have a Fumigating House, with three compartments, so that we can disinfect, at any time, either 50 trees or 10,000.

WALNUTS

The planting of the improved varieties of the “English” Walnut is steadily increasing, not only in Southern California, but along the whole Pacific Coast, even into British Columbia. These trees are as profitable as any other fruit, and are long-lived if planted in suitable soil, which should be deep, well drained, and capable of retaining the moisture during the summer. They should be planted not less than 40 feet apart each way.

Cordiformis
Sieboldiana

The following "French Varieties" are grafted on Black roots at 12, 18 and 30 inches above the ground. This manner of working gives the trees Black Walnut stems, which, with their thick, rough bark, will not be so liable to sunburn, and are, therefore, particularly valuable for use in the hot parts of the State.

## ORNAMENTAL DEPARTMENT

### EVERGREEN TREES AND SHRUBS

Nearly all the plants mentioned under this heading have been once or more transplanted, thereby greatly adding to the certainty of their growing. In order, also, to reduce the amount of soil and consequent freight charges, we have grown those varieties most in demand in pots. In shipping to distant points this is especially advantageous.

All balled trees and plants should be set without removing the burlap from around the roots.

In cases where items are quoted only "per 10" or "per 100," we will not accept orders for less than 5 and 50 respectively.

**NOTICE.**

Where we catalogue and specify SIZE OF BOXES, it means that the trees or plants so listed have been established in boxes for at least six months. Such plants, as well as those in pots, can be shipped and planted at any time of the year. BOXED means that the plants so quoted are of such size that it is necessary to dig them into boxes.

### DECIDUOUS ORNAMENTAL TREES

Please note that all trees in this class over 12 to 14 ft. tall are graded and quoted according to their diameter measured at 4 ft. above the ground. As a rule, such trees have been headed back to 9 ft. and have good heads. With proper planting and after-care there should be little or no loss in using these large trees.

### Wisteria
- **Chinese Purple**
  - Large plants: $1.00
  - Medium plants: $0.50
  - Small plants: $0.25
- **Chinese Double Purple**
  - Medium plants: $0.50
  - Small plants: $0.25
- **Chinese White**
  - Small plants: $0.25
- **Fragrans (white)**
  - Small plants: $0.25
- **Magnifica (light purple)**
  - Medium plants: $0.50
- **Multijuga (light purple)**
  - Large plants: $1.00
  - Small plants: $0.25
- **Multijuga alba (white)**
  - Small plants: $0.25
- **Pink Flowering (new)**
  - 6 in. pot: $2.00

### Bamboo
- **Aurea (Phyllostachys)**
  - 12x12 in. box, 6 to 7 ft: $1.50
- **Assorted**
  - Balled clumps, 10 to 12 ft: $1.50
  - Balled clumps, 8 to 10 ft: $1.00
  - Balled clumps, 6 to 8 ft: $0.75
  - Balled clumps, 4 to 6 ft: $0.60
  - Balled clumps, 3 to 4 ft: $0.50

### Rare Species
- **Boryana (Phyllostachys)**
  - Balled clumps: $1.00
- **Castillonis No. 2 (Phyllostachys)**
  - Balled clumps: $0.75
- **Falcata (Arundinaria)**
  - Balled clumps: $2.00
- **Fastuos (Bambusa)**
  - Balled clumps: $1.00
- **Henonis (Phyllostachys)**
  - Balled clumps: $1.50
- **Marliacea (Phyllostachys)**
  - Balled clumps: $1.50
- **Nana (Bambusa)**
  - Balled clumps: $1.50
- **Palmata (Bambusa)**
  - Balled clumps: $0.75
- **Quadrangularis (Bambusa)**
  - Balled clumps: $3.00
- **Tesselata (Bambusa)**
  - Balled clumps: $1.50

### Palms, Dracaenas, Etc.
- **Areca—Lutescens**
  - 8 in. pot, 4½ to 5 ft: $4.00
  - 7 in. pot, 3 ft: $3.00
- **Brahea—Dulcis**
  - 18x18 in. box, 4 ft: $4.00
  - Balled, 5 to 6 ft: $4.00
  - Balled, 3 to 4 ft: $3.50
  - Balled, 1 to 1½ ft: $2.00

N. B. We can make a special price on Washingtonia Gracilis 8 to 9 ft. and larger; plants to be dug with naked roots and all leaves removed except the undeveloped ones in the center. Large palms of this species handled in this way can be transplanted with slight risk.

**Sonorae (New. For description of the true species see eighth edition (1908) of Catalogue No. 2)**

ROSES

To keep up with the growing demand for the "Queen of Flowers," we are increasing each year our assortment of varieties as well as the quantity grown. By constantly adding new sorts that prove worthy of trial and discarding any that are not satisfactory, we keep our collection up to date and offer an assortment unequaled on this Coast.

The plants offered are strong and vigorous, having been grown entirely in the open ground. They cannot fail to bloom and give satisfaction the first season after planting if properly cared for.

For further descriptions of varieties see our Catalogue No. 2.

NEW AND SCARCE VARIETIES

40 cents each; $3.00 per 10.
